

Spinning Accuracy 1/4 and 3/8 oz.

Model TS 742

Model TS 742 may be used to cast both plug weights depending on how the blank is trimmed. For 1/4 oz do not trim anything off the tip. For 3/8 oz casters liking a smooth softer rod can use the blank in the same configuration as 1/4 oz but other casters who prefer a positive feeling may trim up to 1 1/2 inches off the tip. In either case, the rod may be trimmed off the butt to suit the casters preference for length. This blank can also be used for the ICF event Arenberg. Typically trimmed short from the butt to an overall length about 5 ft 8 inches.

GUIDE PLACEMENT FROM TIP:

Tip; 5 1/4, 12 3/4, 21 1/4, 32, 44

GUIDE SIZE FROM TIP:

Tip ring 7mm, 8mm, 10mm, 12mm, 16mm, 20mm. Spinning guides lower frame style
